What is Video SEO?

Getting found with VIDEO

We can get you found by ranking your video on Google!

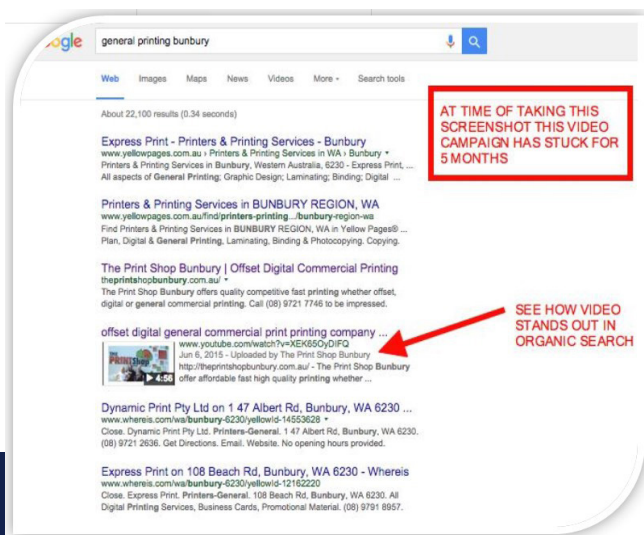

We get your keyword and use a method called stacking. Stacking makes it possible to rank 1 video for 4-10 keyword variations. Keyword/s with the highest monthly search volume determines the cost. See below:

Assessing your cost for Video SEO is shown in the chart below:

Monthly Cost	Monthly Search Volume	Approx Time to Rank	Minimum Duration	The Process
\$100 + gst	70>550	1 month	3 months	<p>These videos are made specifically for SEO. They are professional and best results are achieved when the video is between 30 seconds and 2 minutes in length. We create the videos from either video or images you supply OR we use stock images and/or footage. When the search result is clicked on the prospect is taken back to your own CUSTOM Youtube Channel which we create for you. When the video is watched "live" interactive calls to action appear in the video. Calls To Action include Click To Call, Click to Visit, Click to Skype, Click To Text. This method puts you in 3 different traffic sources being Google Video Search, Google Organic Search AND YouTube Search. Depending on the competition level in your business niche your video rankings can stick for 3 to 6 months (or even longer), which is why we recommend ongoing monthly service to strengthen your rankings and keep your competitors OUT.</p>
\$200 + gst	551>1100	2 months	6 months	
\$250 + gst	1101>2000	3 months	6 months	
\$300 + gst	2001>3000	4 months	12 months	
\$350 + gst	3001>4000	5 months	12 months	
\$400 + gst	4001>5000	6 months	18 months	

Can't afford a monthly commitment?

Then consider a ONCE OFF Video SEO BLAST for only \$399 + gst
